Learning Management System

What is an LMS? LMS stands for "Learning Management System." A Learning Management System (or LMS) is a software package that enables the management and delivery of online and instructor-led training content to learners.

Overall, a Learning Management System (LMS) is a high-level, strategic solution for planning, delivering, and managing all learning events for both internal and external audiences, including online, virtual classroom and instructor-led courses and much more. An LMS is the perfect solution for replacing isolated and fragmented learning programs with a methodical means of assessing and raising competency and performance levels throughout the organization.

Benefits

- Career planning
- Largest pool of like users in the industry (Over 300 using the most recent release of LearnCenter)
- Proven learning technology infrastructure
- Faster deployments
- Measure impact
- Reduce training costs
- Increase performance effectiveness
- Increase learner usage
- Integrate competencies
- Track and manage employee performance
- Introduce revenue based training
- Increase product knowledge
- Manage supervisor training
- Offer desktop training
- Train customer service
- Develop executives
- Retain key talent
- Real-time business intelligence
- Make your sales force more productive
- Implement strategic initiatives consistently
- Decrease time to market for new products
- Fully automate training
- Fill gaps in the leadership pipeline
- Create a performance-driven culture
- Fill key positions
- Enable social networking
- Manage organization-wide strategies
- Comply with regulations
- Facilitate rapid hiring
- Develop the skills of new employees
- Standardize and centralize new hire and employee training
- Increase reach into new markets
- Decrease staff turnover
- Track & audit compliance and ethics training
- Rollout enterprise processes
- Keep partners and resellers in sync
- Merge organizations and cultures effectively
- Cost effective
- Centralize training and records
- Share knowledge across the enterprise
- Just-In-Time (JIT) information and resources for sales, support, clients, and partners
- No travel costs
- Training is available 24/7 on-demand
- Gain a competitive advantage
- Real-time reporting
- Reduce cycle time
- Educate your customers on-line & on-demand
- Increase productivity
- Facilitates compliance with government regulations
- Communicate your value
- Publish and share the latest documents, courses, news, competitor analysis and more 24/7

Stimulus Training Bundle Overview - Train the Whole Office/Department

- 365 Day Access Code to Over 160 Online Course's (available 24/7)
- Microsoft Office XP Training Suite (1 Year Multi User License)
- CISSP Training Suite for Information Security (1 Year Multi User License)
- Our New Shred-IT File Shredding Software (1 Year Multi User License)

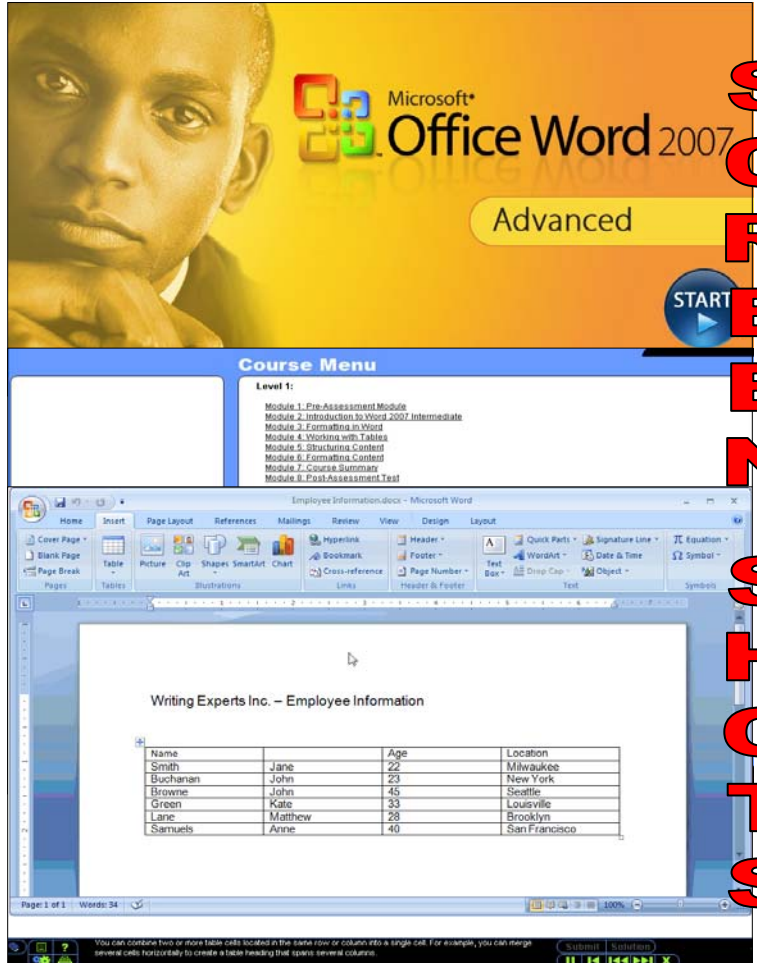

Online Training Breakdown

365 day access code to our Online University to over 160 online training titles.

Courses Included:

- ▶ Microsoft Windows Vista
- ▶ Microsoft Word 2007, 2003, 2002, 2000
- ▶ Microsoft Excel 2007, 2003, 2002, 2000
- ▶ Microsoft Access 2007, 2003, 2002, 2000
- ▶ Microsoft PowerPoint 2007, 2003, 2002, 2000
- ▶ Microsoft Outlook 2007, 2003, 2002, 2000
- ▶ Microsoft Publisher 2003, 2000
- ▶ Microsoft FrontPage 2003, 2002, 2000
- ▶ Microsoft Project 2000
- ▶ Windows XP
- ▶ Microsoft InfoPath 2003
- ▶ Microsoft OneNote 2003
- ▶ Microsoft VBA 2003
- ▶ Microsoft Visio 2003
- ▶ Internet Explorer 5
- ▶ Adobe Acrobat 6.0
- ▶ Adobe Photoshop CS
- ▶ Adobe PageMaker 6.5

SCREENSHOTS

PRE AND POST TESTING

Each course includes pre-course and post-course assessment testing, quizzes, optional audio, hands-on exercises, self-paced tutorials, and real-world examples and scenarios.

SCREEN SHOTS

Each online course is highly interactive and simulates the software environment being trained.

Learners interact with rich, multimedia tutorials in real-time with minimum impact on system and network resources.

With a low bandwidth solution these courses stream in less than 7 seconds even if you're on a connection as low as a dial-up modem.

Microsoft Office XP Training Suite Breakdown

Beginner, Intermediate, & Advanced Training

Learn Microsoft Office xp

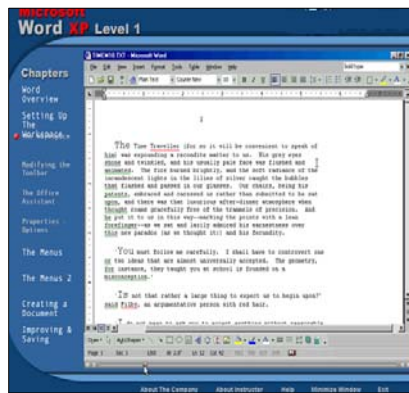

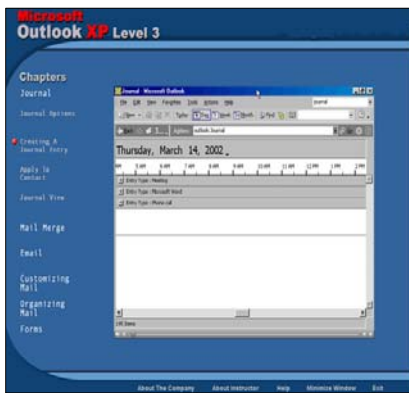

Learn How To...

- Use tools such as task panes and the Send for Review feature to develop professional, collaborative writing projects.
- Organize and analyze complex data in Microsoft Excel 2002 by using workbooks, formulas, and charts. Share data by sending it to others for review, or publish data by using refreshable Web queries to update data automatically.
- Use the task panes of Microsoft Office XP to view information and complete tasks without having to access menus.
- Create professional presentations by using templates, animation, the Slide Design task pane, and more. Add art from the Clip Gallery, insert sounds, movies, and add pictures using the new picture compression feature.
- Use Smart Tags to view and incorporate data from other applications, such as addresses, maps, and driving directions.
- Create and manage a customized database by using Microsoft Access 2002.
- Manage e-mail, instant messages, contacts, and schedules with Microsoft Outlook 2002.

A \$2,000.00 Value Multi-User License

CISSP Training Suite Breakdown

People are the key to a secure organization!

Our CISSP training suite will help your customers with a solution to demonstrate a working knowledge of information security, enhance company's credibility, and secure valuable information.

Technological solutions alone cannot protect an organization's critical information assets.

By having CISSP training on hand you will also have the ability to give your organization a leading edge by providing the highest standard of security.

CISSP stands for Certified Information Systems Security Professional.

They are an independent information security [certification](#) governed by the [International Information Systems Security Certification Consortium](#) (commonly known as (ISC)²). As of June 23, 2008, (ISC)² has reported certifying 58,080 information security professionals in more than 130 countries.^[1] In June, 2004, the CISSP program earned the [ANSI ISO/IEC Standard 17024:2003](#) accreditation, the first IT certification to have done so.^[2] It is formally approved by the [U.S. Department of Defense](#) (DoD) in both their Information Assurance Technical (IAT) and Managerial (IAM) categories.^[3] The CISSP has been adopted as a baseline for the U.S. [National Security Agency's ISSEP](#) program^[4], which further extends the significance of the credential.

Shred-it Software - The Electronic File Shredder!

“All the Kings Horses, And All the Kings Men, Could not put the File back together again!”

What is Shred-it?

The best way to describe **Shred-it** is to use the traditional analogy of the Paper Shredder. Most Companies and individuals buy a Paper Shredder because they are concerned about keeping their data private. They could be storing financial records, classified client lists, source code, or any other piece of confidential information. When an individual crumbles up a document and throws it in the wastebasket, they run the risk of an intruder stealing that data. Even if the wastebasket is emptied and transferred to the dump, the data is still there, and can be retrieved. A Paper Shredder eliminates that possibility.

Believe it or not, Computers work very much the same way. When you delete a file in Windows, it sends the file to the "Recycle Bin". When you empty your "Recycle Bin" it sends the data to a hidden portion of the hard drive where your computer stores deleted files. The advantage of **Shred-it** is that it eliminates the chance of ever recovering that data. **Shred-it** uses a special binary algorithm that works like a Paper Shredder for Computer Files.

How does Shred-it exceed the requirements of the Department of Defense?

In order for a file to be successfully deleted by DoD (Department of Defense) standards the file must be overwritten 7 times. Shred-IT's Delete Algorithm will instantly overwrite the file 100 times to ensure absolute Data Security.

Technical FAQ

Q: Why do I need **Shred-it**?

A: If you value the privacy of your information, this is the product for you. **Shred-it** uses a special binary algorithm designed to protect your confidential files. When you delete a file in Windows, your data is still there and open for all to view.

Q: Will **Shred-it** function properly on the Windows 2000 platform?

A: Of course, **Shred-it** functions on any Windows platform.

Q: When I hit the delete key, is the file eliminated from my system?

A: Absolutely not! Windows simply hides the file from you. And even if it is overwritten, data may still be recovered. **Shred-it** eliminates the file completely.

Q: Will **Shred-it** erase files I don't want erased?

A: Absolutely not! **Shred-it** gives you 2 options of deletion; therefore mistakes cannot happen. You can either tag the file for later deletion, or delete it immediately.

Q: If I have **Shred-it** erase a file and I then change my mind, can I get it back?

A: NO, there is absolutely no means of recovery. It would be futile to even attempt it!

Q: Does **Shred-it** support FAT32? What about large hard drives?

A: Naturally, it will work with any Windows Platform.

Q: Does **Shred-it** work with compressed drives?

A: Yes, **Shred-it** will work with all forms of compression in Windows

Gartner Cost Benefit Analysis

Gartner offers the combined brainpower of 1,200 research analysts and consultants who advise executives in 80 countries every day. Gartner publishes tens of thousands of pages of original research annually and answers 200,000 client questions every year.

Gartner can help you make smarter and faster decisions. Their years of relevant experience and institutional knowledge prevent costly and avoidable errors. Be confident that with Gartner, your decisions are the right decisions.

Productivity Costs Savings / Return on Investment

According to Gartner, a user with an annual salary of \$30,000 working 40 hours a week, spends approximately 3 hours per week attempting routine tasks due to lack of training.

The three hours wasted represent a 7.5% lost productivity rate or \$2,250 per user.

The following matrix illustrates the productivity savings. If our training products increase each user's productivity by 1 hour, this is approximately \$844 in annual productivity savings per user per year.

In an organization with 250 employees or more, the annual productivity cost savings is substantial.

Users	Annual Lost Productivity Cost (\$2,250) *	Annual Productivity Savings (\$844)
1	\$2,250	\$844
50	\$112,500	\$42,200
100	\$225,000	\$84,400
200	\$450,000	\$168,800
350	\$787,500	\$295,400
500	\$1,125,000	\$422,000
1,000	\$2,250,000	\$840,000
2,000	\$4,500,000	\$1,688,000

**Based on \$30,000 annual salary*

Support Costs Savings

Whether or not we have access to training, users forget most of the training or learning content provided. On average, measurable knowledge retention is less than 10% six months after "passing" a student through a classroom type course. According to Gartner Group, each networked user of a Windows based PC accounts for \$310.00 in help desk costs per year.

Help Desk Support = Additional Cost Savings

Using a binary state comparison, our solution will effectively convert up to 95% of your "Class 2 learners" (requiring physical help desk or third party intervention) into "Class 1 learners" (requiring work without requiring helpdesk or support). This will help to eliminate a majority of your support costs (\$310.00 per user).
